Dear Professor Kalmár:

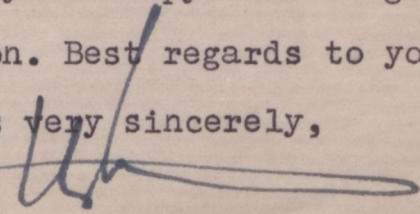

I am very happy to receive your letter of Nov. 4, 1959 and your article "A New Principle for Construction of Logical Machines". Your Chinese is not very good, but is already the best among my foreign friends. Where did you learn your Chinese? Could you tell me ~~about~~ more about yourself?

I am a 100% Chinese, my wife is also Chinese. We have six children, 3 boys and 3 girls. In 1952 we came to Argentina from Hong Kong. I work as a Consultant to big companies, doing Operations Research. We live very comfortably.

I like most of an article I wrote last year "A Mathematical Model of Human Life". Enclosed I'm sending you a copy. Please give me your analytical comments. Thank you.

Hope to receive your reply very soon. Best regards to you and your family.

Yours very sincerely,

encl. booklet
